PROJECTS

Onimortet [https://github.com/jslee423/onimortet.git**]**
A Tetris clone mobile application.
- Created using React Native, implementing stack navigator for navigation and animatable library for component and screen transitions.
- Global state handled by Redux to set difficulty, keep track of lines cleared, score, and current level.

Parley [https://parleyy.netlify.app**]**
A simple chat web application.
- Implemented responsive UI design in React and React router for app navigation.
- Firebase used for all backend management such as user authentication and messages.

EXPERIENCE

Sales Associate - Cedar Beauty Supply   February 2021 – Present
Woodlyn, PA
- Performed sales duties including POS, stocking, and assisting with customer inquiries.
- Managed reward member mailing list and created quarterly promotional emails.

System Analyst - Credit Agricole CIB   May 2015 – May 2020
New York, NY
- Supported the treasury desk trading application, assisting with user's trade issues, resolving any application bugs, and maintaining the production batch script workflow.
- Responsible for all bi-weekly development releases and created bundle of release scripts to automate deployments, reducing monthly production incidents by more than 50%.

UI Design Intern - Visar Collection Co LTD.   May 2013 – August 2013
Kowloon, Hong Kong
- Created prototype for new company website using WordPress CMS.
